

266508 4v lithium battery pack

Which type of battery is used for a 26650?

These are Lithium Ion (Li-Ion) 3.7V 26650 Batteries.

What is a Lithium Werks 26650 battery?

Our high-performance, power cells can be used in fully customizable solutions for multiple market needs. Lithium Werks' 26650 cells are best for Power.Safety.Life.(TM) applications. They deliver very high power due to their use of patented Nanophosphate[®]; battery technology.

Are Lithium Werks 26650 cells safe?

Based on lithium iron phosphate chemistry (LiFePO₄), the cells are inherently safe over a wide range of temperatures and conditions. Whether the application requires outstanding cycle life or stable float reliability, the Lithium Werks' 26650 cells are suitable for a wide variety of power, pulse, or stand-by applications.

They may be configured in series, parallel or a mixture of both to deliver the desired voltage, capacity, or power density. Packs are identified by cell size, number of cells, battery structure, ...

Lithium Werks' 26650 cells are capable of delivering very high power due to their use of patented Nanophosphate[®]; battery technology. Nanophosphate[®]; offers stable chemistry, faster ...

What Are 18650 Batteries? The 18650 is a lithium-ion battery classified by its size, which is slightly larger than a AA battery. The advent of the 18650 brought along a new age of li-ion power ...
