

## 2kWh outdoor power fast charging

Is the river 2 a good battery charger?

The River 2 series is designed to be very portable, and is great for any charging or power needs when out and about. Not just for recreation either - it's well suited for professionals who need to run equipment in the field - especially since it can be combined with solar for charging anywhere.

How does a river 2 power station work?

Here's how it works. The River 2 is a great little power station that combines a very useful range of features and outputs. It's portable enough to throw in a backpack or carry to a picnic, but powerful enough to run a camping fridge from solar, or recharge tools and other gear during a day of work or fun.

Can I use a USB-C charger with a river 2 fan?

A workaround is to use a USB-C charger in the 12V socket, but it would be great if the River 2 had a USB-C input only port on the rear. The River 2 fan won't kick in for USB-C use, but will spool up to high speed if fast charging via AC, or running something that uses a significant amount of the 300W available.

What is the smallest ecoflow power station?

The River 2 is the smallest in EcoFlow's ultraportable River 2 power station series and it has a 256Wh capacity. Note that I tested the Australian spec model, but aside from a different AC plug depending on the country it's sold in, the underlying capabilities are the same.

How fast does the river 2 charge?

When plugged into the wall, the River 2 charges at up to 360W. That's fast, and means it can go from dead flat to full in just an hour - an incredibly handy feature when you need to recharge in a hurry.

Overall, it's elevated my power management experience with its seamless blend of power, speed, and versatility. - EF ECOFLOW Portable Power Station DELTA 2 Max, 2400W LFP Solar Generator, Full Charge in 1 Hr, 2048Wh Solar Powered Generator for Home Backup (Solar Panel ...

Plus, the USB-C PD 100W port enables fast charging for your electronic devices without the need for an additional adapter. Smallest & Lightest 2kWh Power: Weighing just 39.5 lbs, the Jackery ...
