

About solar power generation in Botswana

Botswana enjoys high solar irradiance with approximately 280-330 sunny days annually, yet solar energy remains underutilized due to infrastructure limitations and high capital costs for solar ...

Solar insolation is one of the highest levels in the world, but until recently there were no reports of significant use of solar energy. As of September 2012, the first solar power generation plant in the country has been opened. The Botswana Renewable Energy Conference was held 11-12 August 2014. The Sustainable Development Goals were cited for development of renewable energy through "green and enviro...
