

Asian simple photovoltaic panel manufacturers

Why is PV module manufacturing under pressure in Southeast Asia?

Despite strong ambitions, PV module manufacturing in Southeast Asian is currently under pressure. Operational capacities have been significantly reduced or temporarily halted, primarily due to U.S. import tariffs. Once a strategic workaround for Chinese manufacturers aiming to access Western markets, Southeast Asia now faces growing constraints.

What are PV system services?

The PV system services encompass the manufacturing of solar modules using N-type technology, providing a comprehensive range of PV products, from R&D to production and sales, catering to global markets including North America, Europe, the Asia-Pacific region, and Africa.

Where do PV modules come from?

In 2016, manufacturers in China and Taiwan met the majority of global PV module demand, accounting for 68% of all modules, followed by the rest of Asia at 14%. The United States and Canada manufactured 6%, and Europe manufactured a mere 4%. In 2021 China produced about 80% of the polysilicon, 95% of wafers, 80% of cells and 70% of modules.

G-STAR, founded in 2019 and headquartered in Singapore, is committed to being a trusted global new energy solution provider. With a focus on both PV material manufacturing and PV system ...
