

How much does electricity cost in Australia?

The cost of using electricity is typically known as a 'usage charge,' which is measured in kilowatt-hours (kWh). Most electricity providers across Australia charge between 25 and 45 cents per kWh, but these rates can vary based on the state you're in. Electricity prices are determined by several factors, such as:

How much does electricity cost in Tasmania?

Electricity Average Spot Price: Tasmania: Minimum data was reported at 25.690 AUD/MWh on 17 May 2025. This records a decrease from the previous number of 98.610 AUD/MWh for 16 May 2025. Electricity Average Spot Price: Tasmania: Minimum data is updated daily, averaging 13.455 AUD/MWh from May 2005 (Median) to 17 May 2025, with 7307 observations.

What is the Australian energy update dataset?

It is updated annually and consists of historical energy consumption, production and trade statistics. The dataset is accompanied by the Australian Energy Update report, which contains an overview and analysis of the latest trends. Latest publications: Previous publications:

Do South Australians pay the highest electricity prices per kWh?

South Australians, on average, pay the highest electricity prices per kWh, in addition to often missing out on big discounts and bonus perks. In comparison, households in VIC, TAS and the ACT generally pay the lowest prices per kWh. It's important to note that the kWh price is only a fraction of your electricity bill.

What is the Australian Energy Library?

The Library captures procedures, guides and major reports that live elsewhere on the site. Australia's energy system has a governance structure that includes AEMO, the Australian Energy Regulator (AER), the Australian Energy Market Commission (AEMC), the Energy Security Board (ESB) and the Council of Australian Governments (COAG) Energy Council.

How are electricity rates set?

Electricity rates are set by energy companies like AGL and Origin in most states, as usage charges are deregulated. These rates are not arbitrary; they are largely based on the wholesale price of electricity. This wholesale price is what electricity providers pay generators for power, which is then sold to consumers.
