

Base station photovoltaic power generation system communication equipment circuit board example

What is a 3G base station converter?

In a 3G Base Station application, two converters are used to provide the +27V distribution bus voltage during normal conditions and power outages.

Does Fuji Electric offer a substation type of PCs?

This results in the world highest efficiency of 98.5% (DC 1,000 V product). We have also achieved EURO efficiency of 98.2% (DC 1,000 V product). Fuji Electric provides a substation type of PCS that can be installed outdoors. A switchgear, a step-up transformer, and PCS that can be installed outdoors are integrated on a common base in a single unit.

What is a large-scale power generation system?

The system can be applied to a large-scale power generation system with several to more than 400,000 I/O points. Optimal performance is achieved every time. High-speed data collection and display are achieved even in large-scale systems by optimizing every communication and reducing unnecessary communication.

Does Fuji Electric support total system introduction of photovoltaic power generation facilities?

We support total system introduction of photovoltaic power generation facilities for our customers. Fuji Electric has developed its system stabilization technology for more than 20 years.

The key contributions of this study are summarised as follows: (i) feasibility study of the solar power system to feed remote cellular base stations under various cases of daily solar radiation ...
