

# Battery cabinet power distribution unit

Overall, cabinet PDUs provide a highly efficient and space-saving power distribution solution for server cabinets and enclosures in data centers, server rooms, and other IT environments.

Providing reliable and cost effective power distribution, the Basic PDU offers IEC outlet grips, tool-less installation in server racks, color-coded outlet sections and a high operating temperature.

A battery distribution fuse bay (BDFB) or battery distribution circuit breaker bay (BDCBB) serves as a secondary power distribution unit for -48V DC power from a battery plant to load equipment.

A power distribution unit (PDU) is a device used to distribute electric power to multiple devices within a data center. It is typically installed in a rack and is designed to manage and distribute ...
