Is electricity a primary or secondary energy source in Belize?

eral de Electricidad (CFE). It should be noted that electricity from hydro, wind, and solar, that is, dynamic sources, is considered primary, whereas electricity converted from any pre-existing fuel, particularly combustibles, is considered a secondary energy source. Belize's secondary energy supply added up to 11,470 TJ in 2021.

Which energy sources are used in Belize?

in electricity production. In addition to renewables, Belize also employs non-renewable energy sources comprising diesel, fuel oil, and crude oil, with shares of 2%, 19%, and 2.3%, respectively. Diesel demonstrated a minimal increase of 0.4%, while fuel oil and crude oil decreased in share over the 2021-2022 period.

What are the environmental parameters of Belize?

environmental parameters. In 2022, Belize's total primary energy supply (TES) was 17,836.6 TJ, of which 36% or 6,425 TJ was produced from renewable energy sources (Figure 3). Belize's renewable energy sources include hydro, biofuels (bagasse and firewood), and solar.

What is primary energy supply in Belize?

Energy Supply, by fuel type: The energy supply represented by fossil fuel production within Belize would typically include petroleum gas flared on-site, along with the unrefined products natural gas and crude oil, according to international energy reporting standards. However, that aspect of fossil fuel energy supply is not included in the primary energy supply.

Does Belize have an energy import share?

external energy dependence. In 2022, Belize's energy import as a share of total primary energy supply equalled 64.3%, representing a 2.1% increase in share over the 2021-2022 reporting period. While an increase in energy import share was displayed in 2022, the energy import share was still below the threshold set by a few years prior.

What is Belize's primary energy supply?

Energy Supply, by fuel type: Defined as the raw, unprocessed forms of energy within a country's borders, Belize's primary energy consists of local sources that account for 35.7% of the total primary energy supply.
