

Who sells hypontech photovoltaic inverters in Bulgaria?

Hypontech photovoltaic inverters combine high quality and affordable price. NENCOM is the exclusive representative of Hypontech in Bulgaria. We sell on-grid and hybrid inverters wholesale and retail, we help with settings.

Who sells hypontech in Bulgaria?

NENCOM is the exclusive representative of Hypontech in Bulgaria. We sell on-grid and hybrid inverters wholesale and retail, we help with settings. At the moment, for the European market Hypontech offers single-phase on-grid inverters (red), three-phase on-grid inverters (blue), as well as battery and hybrid inverters (white).

What types of energy meters are used by hypontech inverters?

In systems with Hypontech inverters are used 'smart' energy meters Easton: 1-phase and 3-phase, with direct measurement (up to 100A) and with measuring current transformers (CT). All 4 models are mounted on a DIN rail, have a backlit display and buttons for viewing the measured parameters: active and reactive energy, voltage, frequency and more.

How much power does an inverter use?

The output power on each phase can independently vary from zero to 1/3 of the inverter's rated power. In case of emergency shutdown of the grid, switching to battery operation takes less than 10 ms, providing uninterrupted power supply.

What is a series HHS inverter?

Series HHS -- are 1-phase hybrid inverters with power from 3 to 6kW with two independent MPPTs (one input per tracker). PV input voltage up to 600V. Battery voltage from 80 to 480V. Series HHT -- are 3-phase hybrid inverters with power from 5 to 12kW with two independent MPPTs (one input per tracker).

Where can I find a certificate for a T&V S&D inverter?

Additionally, in the description of each series of inverters you will find the corresponding certificates. Most of the certificates are issued by T&V S&D Product Service GmbH (Germany) and can be checked by the number on the official website of the testing organization.

Summary: High frequency inverters are revolutionizing energy management in Plovdiv, Bulgaria. This article explores their industrial applications, regional market trends, and why businesses ...

GaN technologies are ideal for working in high-frequency power electronic systems (in MHz). Since the GaN has superior electron mobility and bandgap than the SiC and Si, it has superior ...

Bulgarian high-frequency inverter

We can deliver the SANFAG 2400w/4000w Wind Energy Inverter, High Frequency Solar Inverters Off Grid Pure Sine Wave Power Inverter, With Mppt Solar Charge Controller For Off-grid ...
