

# Cambodia power grid energy storage price

Does Cambodia have a power grid?

While the existing grid is lacking, Cambodia's electricity system has significantly transformed over the last decade. Domestic energy production has been increasing at a rate of 8% per year since 2010. However, the country's simultaneous rapid economic growth has created a power supply gap, primarily filled with imported electricity.

Why are electricity prices so high in Cambodia?

The high electricity cost for consumers results from the quantity of imported energy and the outdated energy grid. Electricity prices in Cambodia are among the highest in the region, topping USD 0.137 per kWh. This is considerably more than neighbouring countries.

How much does electricity cost in Cambodia?

Electricity prices in Cambodia are among the highest in the region, topping USD 0.137 per kWh. This is considerably more than neighbouring countries. The price of electricity in Cambodia not only impacts the competitiveness of Cambodian industries but also limits access to reliable power for a significant segment of the population.

What is Cambodia's electricity supply?

The composition of Cambodia's electricity supply is a blend of domestic production and international imports. In 2022, over 25% of the country's energy was imported from Thailand, Laos and Vietnam. Due to the country's high reliance on hydropower, power demand typically outstrips domestic supply during the dry season.

How many solar projects does Cambodia approve?

Cambodia approves 23 power sector projects, including 2 energy storage plants, 12 solar projects. - EnergyTrend Cambodia approves 23 power sector projects, including 2 energy storage plants, 12 solar projects.

How will electricity efficiency policy work in Cambodia?

The policy will be enforced through the Ministry of Economy and Finance, working alongside customs and tax departments to regulate imports. By setting clear electrical efficiency standards, Cambodia aims to minimize wasteful energy consumption, potentially eliminating the need for additional power plants.
