

# Can Afghanistan's solar power generation be done at home

Can Afghanistan produce 220,000 MW of solar power?

Afghanistan can potentially produce 220,000 MW of solar power with its 300 sunny days per year. This proposition is built upon the fact that the country has huge spaces in the desert of Kandahar, Helmand, Hairatan, and Laghman that are well-suited for large-scale solar energy creation with extraordinary levels of productivity.

Is photovoltaic energy a viable alternative for Afghanistan?

Photovoltaic systems can be a very viable alternative in every sense for Afghanistan. Not only they are cheaper, but safeguard the environment and mitigate climate change as well. Until today, Afghanistan has not utilized the full capability of its ample hydroelectric energy sources.

What is the rate of electricity access in Afghanistan?

Afghanistan - the country with a vast potential for energy production - suffers from one of the lowest rates of the population access to grid electricity. According to the estimates, only 30% of the citizens have access to electricity, while the rate of reliable access is somewhere between 10-15% only.

How many Afghans have access to electricity?

According to the estimates, only 30% of the citizens have access to electricity, while the rate of reliable access is somewhere between 10-15% only. Connecting Afghans to Energy supply remains one of the paramount challenges until today, especially in rural areas where three-quarters of Afghans live and only 11% are linked to the grid.

How much hydropower does Afghanistan have?

Until today, Afghanistan has not utilized the full capability of its ample hydroelectric energy sources. The country is expected to have more than 23'000 MW of untapped hydropower potential that can be utilized in the form of micro, medium, and large-scale plants.

What is the geothermal potential of Afghanistan?

Geologically, Afghanistan lies on three tectonic plates. Their motion and collision result in hot springs, hydrothermal minerals, volcanoes, and magma rocks. Although considered, the actual geothermal potential of Afghanistan is yet unexplored.

You use can to indicate that someone has the ability or opportunity to do something. Don't worry yourself about me, I can take care of myself. I can't give you details because I don't actually ...
