

# China Mobile base stations are short of power

How much electricity does China use per base station?

For China, based on a single base station power's energy consumption of 11.5 KWh (Huawei, 2019), we estimate that the electricity consumed by its 5G network by 2030 will be 6.04 ~ 10.5 GW for 6 million base stations, the equivalents of 8.4 % of China's national total power generation in 2019, respectively.

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

What is China's first military-grade mobile 5G base station?

Please contact us for more information. China unveils the world's first military-grade mobile 5G base station, developed by China Mobile Communications Group and the PLA, designed for battlefield use to enable seamless communication for up to 10,000 military robots and drones within a 3-kilometer radius.

How many 5G base stations are there?

These predicted station numbers are considerably smaller than the business-projected 6-million stations, even for the BDDL = 100 % case under the S2 scenario that yielded the number of 5G base stations at 5.03 million, still one million smaller than the business-estimated 5G base stations. This number, however, is implausible.

Does China have a 5G network?

Given that China currently has the largest 5G network in the world (~1.53 million base stations by the end of 2021, Table S1) and that base station number was projected by up to 6-8 million by 2030 (CCID Consulting, 2020), concerns are being expressed regarding 5G mobile networks' environmental effects and sustainability.

What is the world's first mobile 5G base station?

Beijing has unveiled the world's first mobile 5G base station, which, after passing rigorous tests, is now poised for deployment on the battlefield.
