

# China's solar energy supporting energy storage base station

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

How does China promote battery storage?

To promote battery storage, China has implemented a number of policies, most notably the gradual rollout since 2017 of the "mandatory allocation of energy storage" policy (?????), which is also known as the "new energy plus storage" model (???+??).

Will energy storage support solar and wind plants in China?

At least 10 regions in China have ordered renewable power developers to install energy storage as supporting facilities of the solar and wind plants.

Does China have a new energy storage system?

Xu Ziming, Director of the Energy Efficiency and Energy Storage Division, Energy Conservation and Technological Equipment Department, National Energy Administration, pointed out in his speech that since the "14th Five-Year Plan," new energy storage in China has experienced rapid development.

What is Ningxia power's energy storage station?

On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East Ningxia Composite Photovoltaic Base Project under CHN Energy, was successfully connected to the grid. This marks the completion and operation of the largest grid-forming energy storage station in China.

Where does China's storage capacity come from?

The majority of China's storage capacity comes from large-scale storage projects, such as hydropower with reservoirs on the Yangtze River and gigawatt-level battery energy storage systems in Inner Mongolia.
