

Clean photovoltaic energy for Danish power plants

Meeting the Danish climate targets requires a significant electrification of the heating, industry and transport sectors, and electricity for PtX plants, which are to produce green fuels. In addition, ...

A total of 1,008 units of Delta's M50A series solar PV inverters, featuring leading efficiency of up to 98.6% and IP65-rated enclosure, support the cluster of power plants, which is expected to ...
