

# Communication base station inverter grid-connected wind power generation

A DC bus and communication base station technology, which is applied in the field of wind and solar hybrid power generation system for communication base stations based on dual DC bus ...

The invention relates to a wind and solar hybrid generation system for a communication base station based on dual direct-current bus control, comprising photovoltaic arrays, a wind-power ...

The system includes photovoltaic module, integrated optical storage inverter, wind turbine, fan controller and vanadium redox battery. Reserve Diesel / oil generator and load interface for ...
