

Why is battery storage important in Denmark?

Denmark has emerged as a significant player in battery storage technology, playing a vital role in the global transition to renewable energy. As demand for electric vehicles and clean energy solutions grows, the importance of battery storage in the Danish market continues to rise.

Who is responsible for battery production in Denmark?

In Denmark the rules on producer responsibility are administered by DPA. Producer or importers? If you produce or have a battery product produced in your own name/brand, you are subject to producer responsibility, including duties to register, take back, and report on batteries sold in Denmark.

Do you have a responsibility for reselling batteries in Denmark?

Environmental legislation on batteries and accumulators sets out producer responsibility; this means that if you produce or import batteries in view of reselling them in Denmark, you must contribute to the organisation and financing of take-back and management of those batteries when they reach the end of their service life.
