

The main priority for the Democratic Republic of Congo's power sector is to increase access to electricity. The Democratic Republic of Congo is a large country with 10 million households of ...

What is the main priority for the Democratic Republic of Congo's power sector? The main priority for the Democratic Republic of Congo's power sector is to increase access to electricity. The ...

Overview Electricity Petroleum Coal Renewable energy (other than hydroelectric) The Democratic Republic of the Congo has reserves of petroleum, natural gas, coal, and a potential hydroelectric power generating capacity of around 100,000 MW. The Inga Dam on the Congo River has the potential capacity to generate 40,000 to 45,000 MW of electric power, sufficient to supply the electricity needs of the whole Southern Africa region. Ongoing uncertainties in the political arena, and a resulting lack of interest from investors has meant that the Inga Dam's potential ha...
