

Design of wind-solar hybrid tower top for communication base stations

Can hybrid systems be used to power telecom towers?

Similarly, modalities of optimally using hybrid systems for powering telecom towers should also be identified. Since the past two decades, conventional power supply options including the grid, batteries, and diesel generators have dominated the telecom towers' electricity supply.

Can a hybrid solar and wind power system provide reliable electric power?

This paper presents the solution to utilizing a hybrid of photovoltaic (PV) solar and wind power system with a backup battery bank to provide feasibility and reliable electric power for a specific remote mobile base station located at west arise, Oromia.

Can a hybrid system power a telecom tower in Bangladesh?

The telecom tower is located in Chittagong in Bangladesh. The results of a HOMER based study have pointed towards a preliminary feasibility of using such a hybrid systems for powering telecom towers in Bangladesh. Kabir et al. (2015) is also proposed a microcontroller based power management for proposed hybrid systems in Bangladesh.

What are the components of PV and wind-based hybrid power system?

PV and wind-based hybrid power system mainly consists of 3 parts (Yu & Qian, 2009): (i) wind power generation system (which includes a wind turbine, generator, rectifiers and converters), (ii) PV power generation system, and (iii) single-phase power supply inverter.

What is a hybrid solar system?

Dahono et al. (2009) proposed a hybrid system comprises of 4.8kWp solar PV and 2.5 kW wind turbine along with 750 AH battery and a DG set to power telecom tower with an average load of 36 kWh per day. They have suggested that system performed stable and more economical over conventional options.

Do telecom towers need a grid-based power supply system?

Thus, a grid-based conventional power supply system for telecom towers usually depends on a DG and batteries to provide uninterrupted power during grid power outages (Amutha & Rajini, 2015; Gandhok & Manthri, 2021; Olabode et al., 2021).
