

# Duolun Wind Power Energy Storage Project

What is Datang Duolun 150000 kilowatt wind and solar hydrogen Integrated Demonstration Project?

The Datang Duolun 150000 kilowatt wind and solar hydrogen integrated demonstration project has assisted coal chemical industry in achieving green and low-carbon transformation by replacing "gray hydrogen" with "green hydrogen".

How many generator units does Datang Duolun have?

The 175,000-kw renewable energy substitution project of the Datang Duolun coal-fired self-owned power plant is designed with 286.25-megawatt generator units.

Where is Datang Duolun?

Located in Duolun County in Xiliin Gol League, North China's Inner Mongolia Autonomous Region, the 150,000-kilowatt Datang Duolun wind-solar hydrogen production demonstration project is China's first medium-large off-grid demonstration project of deep coupling coal chemical technology for wind and solar hydrogen production.

What is Datang Duolun & Xilingol League?

On November 22, 2023, the groundbreaking ceremony for the Datang Duolun 150000 kW wind solar hydrogen integrated demonstration project and the Datang Duolun coal chemical self owned coal-fired power plant renewable energy substitution project with a capacity of 175000 kW was held in Duolun County, Xilingol League.

What is wind and solar hydrogen production project?

Among them, the wind and solar hydrogen production project is the first medium-sized and large-scale demonstration project of deep coupling coal chemical technology for wind and solar off grid hydrogen production in China, and the green power replacement project does not rely on peak shaving and consumption of the power grid. Editor/Zhao E
