

Eastern European Photovoltaic Module Project

Is Eastern Europe a promising market for solar energy deployment?

Eastern Europe indeed represents a promising market with untapped potential in solar energy deployment, given its early-stage market development. Solar energy, being highly competitive and increasingly cost-effective, is expected to play a key role in the region's energy future.

Is European Solar Policy undergoing a structural contraction?

European policy is shifting from encouraged deployment to mandatory deployment, and the window for incentives in commercial and industrial solar is undergoing a structural contraction.

Are commercial and industrial photovoltaic systems a strategic component of corporate energy planning?

Against the backdrop of accelerated energy restructuring across Europe, commercial and industrial photovoltaic systems have increasingly become a strategic component of corporate energy planning.

Does Solartech offer a complete service for a photovoltaic power plant?

Once the project is completed, SOLARTECH offers a complete service for the photovoltaic power plant. The SOLARTECH team has completed more than 100 photovoltaic power plants with a total capacity of more than 230MW for the largest investors in renewable energy in Poland.

From initial discussions to grid connection in just six months: In November of 2023, joint venture Iqony Solar Energy Solutions (SENS) and LSG realized a new solar farm project ...
