

How many companies in Europe manufacture solar PV modules?

Today, at least 38 companies are active in Europe manufacturing the equipment and machinery that produces vital steps of the solar PV module supply chain, including cells, ingots, wafers, and polysilicon. EU Clean Industrial Deal: Opportunity for renewables and European manufacturing

What is the EU solar manufacturing map?

The EU Solar Manufacturing map gives an overview of solar manufacturing companies active along the solar PV chain. On this map, you'll find manufacturers spanning from polysilicon to module as well as the aggregate production capacities for each segment.

What does the new EU report 'solar production equipment' mean for solar PV?

The new report „Solar Production Equipment - Key players in the EU's industrial ecosystem for solar PV" explores the European capacity to manufacture the equipment and machinery that produces at each stage of the solar module manufacturing process.

Are solar panels made in Europe certified?

All solar panels made in Europe are required to carry this certification. This certification, developed by the International Electrotechnical Commission (IEC), specifies test procedures to assess the performance of crystalline silicon terrestrial photovoltaic (PV) modules under natural sunlight.

Can European solar production underpin resilience?

A new market analysis from SolarPower Europe highlights the potential of European solar production to underpin the resilience of the European sector. SolarPower Europe has published a new report mapping Europe's solar PV module production equipment capacity.

Who are Europe's leading solar manufacturers?

In the following section, we provide an overview of 59 leading manufacturers, all of which are contributing significantly to Europe's renewable energy landscape. From established companies such as Primroot.com and HUAWEI to innovative newcomers, these manufacturers represent the cutting edge of solar technology.
