

Factory with energy storage equipment

In 2024, about 60% of European factories are actively investing in energy storage equipment for factories to optimize power use -- a figure that continues growing as systems become more ...

A car factory in Detroit suddenly loses power during a heatwave. Instead of halting production for hours, it switches to its giant "energy piggy bank"--a lithium-ion battery system--and keeps ...

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in ...
