

Will Helsinki become Finland's top city solar energy producer?

Helsinki has long dominated the position of being Finland's top city solar energy producer. However, it appears this will soon come to an end. Oulu city plans on installing a solar plant with an output of 420 kilowatts topping the Kivikko solar plant.

Will Atria Finland expand the photovoltaic solar park?

Atria Finland, in conjunction with Nurmon Aurinko Oy, plans to expand the photovoltaic solar park in connection with the Nurmo plant. The project aims at doubling the panel capacity of the current solar park, which was launched in 2018. The extension of this park will have an impressive number of 9,400 solar panels or more.

Is Heinävesi a good site for solar power generation?

The Heinävesi area is large and open and almost unimpeded by shadow. During the year, the project obtained a legally valid decision on the need for planning, and permit applications for the future use of the area were submitted. The area offers an excellent potential site for solar power generation.

6 days ago; Excess renewable energy is stored in the sand battery to later provide heat energy for the Finnish municipality of Pornainen. (Image credit: Polar Night Energy) With a heating ...

In 2020, EPV Energy (EPV) started planning its first industrial-scale solar power project. After looking into the optimal location for the solar farm, EPV decided to build it on a peat production ...
