

Ghana Kumasi Energy Storage Project Profits

Will Kumasi & Prestea gas pipeline be a good investment?

"The construction of the natural gas pipeline to Kumasi and the gas processing plant in Prestea will have significant economic and environmental benefits not only for Genser but also for Ghana and the West African sub-region", Genser explains.

How much money does Genser Energy Invest in Ghana?

Genser Secures >\$400 Million for Gas Pipeline and Processing Projects in Ghana - Africa's premier report on the oil, gas and energy landscape. Genser Energy has achieved financial close for an eight (8)-year \$425 Million funding package to in part, finance the following:

Why should Genser build a natural gas pipeline to Kumasi?

The construction of the natural gas pipeline to Kumasi and the gas processing plant in Prestea will have significant economic and environmental benefits, not only for Genser, but also for Ghana and the West African sub-region.

Will a new pipeline in Kumasi boost natural gas production?

"The availability of cheaper and readily accessible piped natural gas in Kumasi and the central belt of Ghana via the new pipeline will encourage industries to switch from imported trucked diesel and heavy fuel oil (HFO) to indigenous natural gas as a low-carbon intensive fuel.

Why should Ghana invest in a gas conditioning plant?

The gas conditioning plant will produce cleaner fuels and establish Ghana as a significant producer and exporter of Natural Gas Liquids (NGL).

Why should Ghana invest in a natural gas pipeline?

The pipeline will also support relocation of power plants from coastal regions to reduce line losses and improve efficiency on the national grid. Moreover, the gas conditioning plant will produce cleaner fuels and establish Ghana as a significant producer and exporter of Natural Gas Liquids (NGLs)".
