

Ghana's energy storage export company

Is Ghana an electricity exporter?

Since 2007, Ghana has become an electricity exporter and since 2011 an exporter of crude oil, and natural gas, and a generator of electricity by thermal energy, hydropower, solar energy and renewable energies since 2012.

What is the energy sector in Ghana?

Ghana's energy sector is such that the government is involved in the processes of energy production, distribution, and trade. Energy is sourced from both renewables and fossil fuels, which form the basis of the electricity supply and consumption in the country.

How can fueltrade help Ghana meet its energy demand?

To play a key role in helping Ghana to meet its energy demand, Fueltrade progressively invests in building an integrated value chain, as shown by our wide range of services. By being present at various levels of the supply chain, we can ensure that our customers are delivered with the highest quality products at the best prices.
