

How about the new energy storage 48v communication base station lithium battery

Long time storage: When the battery needs to be stored for a long time, it should be charged to a state of near 50% power, with a voltage of about 50.7V, and placed in the recommended ...

In the future, with the large-scale production of lithium energy storage batteries and falling costs, the 48V LiFePO₄ battery pack will play an increasingly important role in the field ...
