

How much does solar photovoltaic panels cost in Brazil

Should you buy solar panels in Brazil?

If you opt for the most efficient solar panel brands, you'll end up paying more upfront than if you opted for the most affordable panels. On the other hand, more efficient panels could save you more in the long run on your power bills. Additionally, add-on products, such as solar batteries, can bring your total well above the Brazil average.

Are solar modules coming to Brazil?

However, some of these PV modules have not yet arrived in Brazil, which will be reflected in the import data for the first quarter of 2024. In 2023, the price of solar modules in Brazil fell by an average of 40%, mainly due to the expansion of the Brazilian solar industry.

Is rooftop PV a viable option in Brazil?

Rooftop PV accounts for around 70% of the installed PV capacity in Brazil, and as the information about the widening price difference between solar electricity and retail electricity tariffs spreads, more and more residential consumers embark on the rooftop PV option.

How many rooftop PV systems are installed in Brazil?

To date, 2.3 million rooftop PV systems have been installed in Brazil, with the potential to install more than 90 million rooftop PV systems. In 2023, Brazil added more than 10GW of PV capacity, with a cumulative installed capacity of more than 37GW, making it the fourth largest in the world, behind China, the United States and India.

Why is PV the second largest contributor to Brazil's electricity mix?

Favorable net metering legislation, rising conventional electricity tariffs, and consistent and strong downward trends in photovoltaic equipment prices in recent years have led PV to become the second largest contributor to Brazil's electricity generation mix.

What is the PV uptake rate in Brazil in 2023?

Image: TAIS HELENA DE CARVALHO, Unsplash In 2023, PV uptake in Brazil grew at a rate of more than 1 GW per month (70% of that rooftop PV), and the cumulative installed PV capacity reached over 37 GW. The deployment rate is 60 W per person per year and is fast enough to double the installed capacity every two years.
