

How much does the French energy storage fire protection system cost

What is energy storage price?

The price is the expected installed capital cost of an energy storage system. Because the capital cost of these systems will vary depending on the power (kW) and energy (kWh) rating of the system, a range of system prices is provided.

2. Evolving System Prices

How much does fire suppression cost?

Fire suppression costs vary widely based on system type, protected area size, and specific property requirements. In 2025, expect to pay \$1.50- \$3.00 per square foot for basic fire sprinkler systems in new construction. Due to additional labor and materials, retrofitting existing buildings typically costs \$2.00- \$7.00 per square foot.

What is the Energy Storage pricing survey (ESPs)?

3. Purpose The annual Energy Storage Pricing Survey (ESPS) is designed to provide a reference system price to market participants, government officials, and financial industry participants for a variety of energy storage technologies at different power and energy ratings.

Why should you use a FirePro battery storage system?

Utilizing total flooding technology, FirePro systems quickly cool and smother fires, reducing the possibility of re-ignition and thermal runaway propagation. Tested and proven, they ensure rapid, efficient fire control, making them essential for safeguarding your battery storage solutions.

How much does a fire suppression system cost in 2025?

The cost of fire suppression systems in 2025 varies based on multiple factors. Here's a detailed breakdown:

Sprinkler Systems: Typical commercial fire sprinkler systems cost \$1.50-\$3.00 per square foot for new construction and \$2.00-\$7.00 per square foot for retrofits. Specialized high-pressure systems may cost more.

What are the ESS safety requirements for energy storage systems?

The International Fire Code (IFC) published its most robust ESS safety requirements in the most recent 2021 edition. By far the most dominant battery type installed in an energy storage system is lithium-ion, which brings with it particular fire risks.
