

How much has France invested in energy storage power stations

What is France's new lithium-ion energy storage system?

The new lithium-ion energy storage system in France will have a storage capacity of 25 megawatt hours (MWh) and output of 25 MW of power, making it the largest in the country. It will be used to provide fast reserve services to support the stability of the French power grid.

What is the largest battery-energy storage project in France?

Total has announced the largest battery-energy storage project in France- a 25 MWh/25 MW system to be installed later this year in Mardyck, at the Flandres Center, in Dunkirk's port district.

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. France had 90MW of capacity in 2022 and this is expected to rise to 359MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.
