In the first quarter of 2019, Romania imported 1.13 TWh compared with 0.63 TWh in the same period of 2018 and exported 0.86 TWh compared with 1.83 TWh in the same period of 2018.

Where do electricity companies buy electricity in Europe?

Most electricity companies in Europe buy electricity on a common market place, such as Nord Pool. All power plants that produce electricity and electricity companies that supply electricity to homes and businesses meet there. Based on supply and demand, prices are set for each hour and each area, one day in advance.

What determines the price of electricity in Europe?

Supply and demand determine the price of electricity in Europe. If there is a high production of electricity from power plants and demand is low, the price will fall. If, on the other hand, the production of electricity is small and demand is high, prices will increase.

What is Europe's electricity market?

Europe's electricity market is characterized by a diverse array of energy sources. The main source of electricity across the continent varies by region, reflecting different geographical and economic factors. In many European countries, nuclear energy and natural gas are significant contributors to the electricity mix.
