

How to transform the base station power supply

What are the components of a base station CB system?

Remember, the longer the CB antenna, the more potential range that you will have. The basic components for a Base Station CB System include a CB radio, power supply (if you are using a mobile CB radio instead of a base station CB radio), coax, and an antenna.

Does a CB radio come with a power supply?

With your CB radio in place, you can connect the cables from both the power supply and the antenna. One key aspect of maximizing the signal and range of your home base CB radio is to adjust your antenna's height.

Which base station Radio will plug directly into my wall outlet?

We have selected the Galaxy DX2547 first, as this is the only base station radio that we offer that will plug directly into your wall outlet. You can choose to get a mobile CB radio, like the DX959B, but will require an additional power supply.

Should you set up a home base station?

Setting up a home base station for your CB radio can provide several benefits. You can stay connected with friends and family, monitor emergency channels, and be better prepared for any situation. While it might seem daunting, setting up a CB base station is actually a simple and straightforward process.

What is a base station & how does it work?

A base station is generally a radio system that is set up in a fixed location such as house or building. Since a fixed location allows one to install a much taller antenna than an antenna on a vehicle, you can get significantly more potential range. Remember, the longer the CB antenna, the more potential range that you will have.

How do I connect my mobile CB radio to my power supply?

The power supply is plugged into your wall outlet and your mobile CB radio will be connected to the power supply. This is generally cheaper than selecting the Galaxy DX2547 even though you would be purchasing two products (mobile CB radio and power supply) instead of one product, the DX2547. We have selected the DX959 and PS12 for this kit.
