

Industrial photovoltaic panel manufacturers

Can a manufacturing company install a solar panel system?

If your manufacturing company has a large, unutilised roof space, you may be able to take advantage of a Power Purchase Agreement (PPA). If successful, you'll have a solar panel system installed at no cost, plus savings on your energy bills for duration of the 20-40 year term.

Where is First Solar based?

First Solar, Inc. is based in Tempe, Arizona. It was founded in 1999 and has developed and constructed many of the world's largest grid-connected solar power plants. SunPower Corp, on the other hand, is based in San Jose, California, and was founded in 1985. The company supplies solar panels for residential and commercial applications.

Where is EPC based?

In Turkey, the company has manufacturing facilities for buses, trucks (already with a 5MW PV system powered by SolarEdge) and spare parts, and other operations, including an IT hub and an after-sales services network. Remote Monitoring and Maintenance Give Taiwan-based EPC the Edge for 3-Roof Solar System.
