

Inverter with adjustable output voltage

The TPS63700 is an inverting DC/DC converter generating a negative output voltage down to -15 V with output currents up to 360 mA, depending on input-voltage to output-voltage ratio. With a ...

About this item This Pure Sine Wave Inverter is a combination of an inverter, battery charger and AC auto-transfer switch. High transfer efficiency is above 90%,, complete isolate surge interference of input & output"s voltage and current, Impact resistance, super load ...

When the battery restores the voltage value set by yourself (such as solar charging), the inverter will restore the normal output of the inverter, and realize unattended full automatic operation!

Inverter with adjustable output voltage
