

Ireland's energy storage project layout

Does Ireland need an energy storage policy?

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO₂ emissions by 2030. There are 10 key policy actions in the framework outlining the timings and key stakeholders involved in delivering them. Key points:

What is Ireland's Electricity storage policy framework?

The policy framework is a first of kind policy, which clarifies the key role of electricity storage in Ireland's transition to an electricity-led system, supporting Ireland's 2030 climate targets, it may be considered as a steppingstone on Ireland's path to net zero carbon emissions.

What is the energy storage sector like in Ireland?

Decommissioning and recycling at end of life In Ireland, the energy storage sector comprises mainly of an operational pumped hydro generation facility and c.700MW of short duration batteries providing system services, this will need to grow to c.4.5 GW by the mid 2030s.

What is Ireland's energy storage strategy?

As part of the energy storage strategy, identify Ireland's competitive advanced capabilities such as our renewable and digital technologies sector and how these can be leveraged to create additional adjacent job opportunities. Promote public and private sector participation in EU and international research and skills development programmes.

How much battery storage do we need in Ireland & Northern Ireland?

In 2021 energy experts Baringa estimated that to hit the 80 per cent renewable electricity targets in Ireland and Northern Ireland by 2030 we would need at least 1,700 MW of battery storage on the island of Ireland. Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power.

Is Ireland a game changer for long duration energy storage?

Ireland - A Game Changer for Long Duration Energy Storage? This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO₂ emissions by 2030.

While there are technical and geographical constraints for certain technologies, three technologies suitable for implementation in Ireland are battery storage in the short term, pumped storage ...
