

Japanese power generation container manufacturer

Why do Japanese companies make generators?

Japanese companies are known for their attention to detail, ensuring that every component of their generators meets the highest standards. This commitment to quality results in generators that are durable, efficient, and capable of withstanding the most demanding conditions. Innovation is at the heart of Japanese manufacturing.

What is the capacity of a container power generator?

Container power generators are available with a rated capacity of 30 kVA to 3000 kVA. Depending on the asked performance and execution, the generators are mounted in soundproof, weatherproof ISO container with a length of 10', 20' or 40'.

What makes Japanese-made generators a good choice?

Fuel efficiency is a hallmark of Japanese-made generators. Manufacturers such as Honda and Yamaha have developed advanced engine technologies that maximize fuel economy without compromising power output. This not only reduces operating costs but also minimizes the environmental impact of generator use.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

Does Japan have a yoroi reactor?

Key Takeaways: Japan has deployed the Yoroi Reactor, a sealed, shipping container-sized microreactor, in remote communities. Designed for disaster resilience and clean energy access, the Yoroi runs for ten years without refueling or onsite staff.
