

Jordan Industrial Energy Storage Product Introduction

How can Jordan improve the oil industry?

4-2 Enhance Jordan's role in providing logistics to transport oil and oil byproducts to and from neighboring countries. 5-2 Increase storage capacities for oil byproducts to comply with international standards and improve local logistics. 5-6 Switch from a regulated market to an open market through liberalizing oil byproducts prices.

Can Jordan produce electricity from oil shale?

Work is also underway on a project to produce electricity from direct combustion of oil shale with a capacity of (470) megawatts, to be operational in 2020. The energy sector in Jordan has made significant achievements in recent years, but it faces various challenges.

What is going on with electricity in Jordan?

Electrical energy exchange with Egypt has been ongoing, contributing to the stabilization of the Jordanian electrical network. Agreements have been reached to increase the export capacity of the Jericho area, and negotiations for electricity supply contracts to Iraq are in progress.

What has been done to stabilize Jordan's electrical network?

Work has also persisted in completing Jordan's electrical connections with neighboring countries and reinforcing existing interconnection lines. Electrical energy exchange with Egypt has been ongoing, contributing to the stabilization of the Jordanian electrical network.

How are integrated policy themes implemented in Jordan?

These integrated policy themes are being executed through clear and specific action mechanisms. Work has continued to strengthen and develop the Jordanian electrical system, enabling it to handle increased electrical loads and integrate new conventional and renewable electric power generation plants.

Does Jordan need natural gas?

The port has effectively secured the electrical system's natural gas requirements, leading to approximately 88% of electricity generation from natural gas by the end of 2018. This initiative has significantly bolstered Jordan's energy security and diversified its energy sources.

This study aims to explore the potential of hydrogen in decarbonizing industrial heat in Jordan [5]. While there are numerous other applications for hydrogen within the energy transition [6], this ...
