

Jordan's containerized energy storage system is customizable on demand

Why should you choose a containerized ESS?

The smart BESS technology in our Containerized ESS allows for precise control of power delivery, ensuring optimal energy utilization. It intelligently manages the charging and discharging process, preventing overcharging or over-discharging, which extends the battery's lifespan.

What is a containerized energy storage system (ESS)?

Our containerized energy storage system (ESS) integrates with EMS to maximize revenue through precise and efficient control. Optimized hardware and software deliver higher conversion efficiency with millisecond response times.

What is C&I containerized energy storage?

Our C&I containerized energy storage solution leverages EV-safe LFP battery technology for high performance. Equipped with a standard 3-level Battery Management System (BMS) and a unique 'separate cluster, separate management' approach, this high-capacity industrial battery storage system ensures fault self-diagnosis and self-recovery.

What is a containerized ESS battery?

The Containerized ESS includes an HVAC cooling method for the battery room, reducing operational temperatures and extending the battery's lifespan. Moreover, it complies with international standards like IEC 62933, IEC 62619, and GB_T36558, guaranteeing top-quality high-capacity industrial battery storage.

What is Ace battery's containerized energy storage system?

With its advanced microgrid system, this containerized energy storage solution excels in both on-grid and off-grid settings, ensuring seamless energy management. ACE Battery's containerized energy storage system features Large Format Prismatic (LFP) cells for robust performance.

How safe is the C&I ESS container?

Our C&I ESS container prioritizes safety with features like the FM200 fire-fighting design, which quickly suppresses fires without harming the environment. The system is designed with IP55 protection for the battery room, safeguarding it against dust and water ingress, and IP34 protection for the PCS room.
