

Korean 5G communication base station hybrid power supply

What is HVDC system for 5G network?

With the increase of power density and voltage drops on the power transmission line in macro base, it is recommended to use HVDC system for the 5G network. Requirements to ICT equipment Power Supply Unit (PSU) and supporting facilities. -42V. It means that if the voltage drop is more than 6V, the ICT equipment will be protected.

What is the coverage area of 5G high-frequency base stations?

The radius of coverage area of 5G high-frequency base stations will be less than one-tenth of that of 4G base stations, and the coverage area of 5G high-frequency base stations will be less than one percent of that of 4G base stations. The deployment of macro base stations is difficult and the site resources are not easy to obtain.

What is the work difficulty of 5G network & powering solution?

work difficulty. 1) 5G Network general descriptions, cells 2) Powering solution divided into local powering, remote coverage, and impact on powering strategy, powering and share infrastructures in three different type of 5G network and feeding solutions cases and there will be very technical specifications.

How to calculate sectional area of 5G power supply cable?

The Sectional area of the 4G power supply cable is calculated by 6mm² The Sectional area of the 5G power supply cable is calculated by 16mm². installed a DC/DC converter to increase the system 57V or 60V.
