

Latest on Ireland's integrated energy storage solution

Could energy storage transform Ireland's energy system?

If this pipeline was built out, the report states that Ireland could capture all of that wasted energy, further reducing our reliance on fossil fuels, and driving down energy costs for consumers. "Energy storage solutions can transform our electricity system for the better," said Bobby Smith, head of Energy Storage Ireland.

Are battery energy storage systems a 'great achievement' in Ireland?

ESB Networks described the project as a "great achievement for battery storage" in Ireland. Battery energy storage systems, often referred to as Bess, are regarded as a vital part of the Ireland's fledgling renewable energy sector and demand for them has never been higher.

How will long-term storage technology impact Ireland's power system decarbonisation?

New and emerging long duration storage technologies will play a critical role in delivering an affordable, fully decarbonised power system to the people of Ireland. #1 We have a problem: The amount of wasted renewable energy in Ireland is projected to increase exponentially as we attempt to deliver on our power system decarbonisation targets.

What is the electricity storage policy framework for Ireland?

The Electricity Storage Policy Framework for Ireland This is a strategic initiative aimed at transforming Ireland's energy infrastructure. As the use of renewable energy sources increases, so too does the challenge of managing the intermittent nature of these energy sources and ensuring that a stable energy infrastructure is in place.

Should 'long duration' electricity storage systems be integrated into Ireland's Electricity Grid?

In this regard, greater emphasis is placed on ensuring 'long duration' electricity storage systems - systems that have the capacity to deliver electricity throughout at least a four-hour period - are integrated into Ireland's electricity grid.

How much wind energy is wasted in Ireland?

According to Energy Storage Ireland, 14% of all wind energy generated in Ireland last year was wasted due to lack of storage. Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland.
