

What is a PV combiner box?

A pv combiner box in a solar photovoltaic (PV) system is an electrical device that combines the output of multiple solar panels (PV strings) into a single electrical output.

Who is letop - a professional PV combiner box manufacturer?

As a professional PV combiner box manufacturer, LETOP has ten years of expertise in C&I solar sector, providing safe and reliable product solutions for system integrators and engineering companies. As PV generation technology rapidly advances, large-scale ground-mounted plants are evolving towards higher voltage and larger capacity.

Are PV combiner boxes waterproof?

Enclosure Ratings: PV Combiner boxes are typically designed with a specific enclosure rating, YRO box IP65-rated enclosure, is dust-tight and protected against water jets. The PV Combiner boxes are constructed with materials that are resistant to water, proper installation is crucial for maintaining the waterproof integrity of the pv combiner box.

How many string configurations can a combiner box support?

The combiner box supports a maximum of 24 string configurations, it is suitable for 1500V DC system voltages. It features industrial-level protection design, including string monitoring, RS485 bus/standard MODBUS-RTU protocol, arc fault detection, and fast shutdown/fireman switch functions.

What is included in a combiner box?

Each combiner box comes with advanced features including up to 1500V 400A UL Listed DC Disconnects and UL Listed Fuses from 10A to 56A, delivering unbeatable performance with utmost safety.
