

Liechtenstein Wind-Solar Energy Storage Power Station

Is Liechtenstein a solar power station?

Samina Power Station, currently the largest of the domestic power stations, has been operational since December 1949. In 2011-2015, it underwent a reconstruction that converted it into a pumped-storage hydroelectric power station. In recent decades, renewable energy efforts in Liechtenstein have also branched out into solar energy production.

How many hydroelectric power stations are there in Liechtenstein?

Liechtenstein has used hydroelectric power stations since the 1920s as its primary source of domestic energy production. By 2018, the country had 12 hydroelectric power stations in operation (4 conventional/pumped-storage and 8 fresh water power stations). Hydroelectric power production accounted for roughly 18 - 19% of domestic needs.

What is the oldest power station in Liechtenstein?

Lawena Power Station is the oldest in the country, opened in 1927. The power station underwent reconstructions in 1946 and 1987. Today, it also includes a small museum on the history of electricity production in Liechtenstein. Samina Power Station, currently the largest of the domestic power stations, has been operational since December 1949.

What is Liechtenstein's national power company?

Liechtenstein's national power company is Liechtensteinische Kraftwerke (LKW, Liechtenstein Power Stations), which operates the country's existing power stations, maintains the electric grid and provides related services. In 2010, the country's domestic electricity production amounted to 80,105 MWh.

How much energy does Liechtenstein produce from renewables?

Energy production from renewables consisted of 27,71 % hydropower production (8,91 % imported and 18,80 % domestic), as well as 4,76 % produced domestically from solar energy. Liechtenstein's overall energy production from renewables consisted of 8,91 % imports and of 23,56 % domestic, non-export production.

What percentage of Liechtenstein's electricity comes from non-renewable sources?

In 2016, non-renewable sources accounted for 67,35 % and renewable sources for 32,47 % of Liechtenstein's electricity supply. Energy production from non-renewables consisted of 56,88 % foreign imports of electricity produced by nuclear power, and 0,65 % of electricity produced in Liechtenstein from imported natural gas.
