

# Low-speed lithium battery pack

What is a Trojan lithium onepack battery?

Trojan Lithium OnePack features a self-protecting Battery Management System(BMS),four levels of safety redundancy,and a stable lithium-iron-phosphate formula. As is the case with all Trojan Lithium-ion batteries,Trojan Lithium OnePack 48V battery packs are designed,tested,and undergo final processing in the USA for an added level of security.

How long does a Trojan lithium battery last?

With a lifespan of 10+years,the Trojan Lithium OnePack delivers best-in-class durability and longevity. An industry-leading 8-year warranty further protects the battery investment. Advanced Safety.

How long does a lithium battery last?

Ensures a long service life up to 5-8 years. High Quality Materials: This battery single-cell lithium battery is composed of an automotive-grade large monomer ternary lithium battery and is equipped with an explosion-proof valve. The cycle of life is over 2000 times.

Travel up to 60 miles on a single charge with the lithium-ion 48-volt battery pack. Additionally, the Trojan Lithium OnePack maintains acceleration with no loss of power, even when driving uphill.

With the high energy density, longer cycle life, no memory effect, smaller self-discharge, smaller volume, and lighter weight, fast charging and discharging performance, lower maintenance ...
