

# Middle East 12v lithium iron phosphate outdoor battery cabinet

What is a lithium iron phosphate (LFP) battery?

Lithium Iron Phosphate (LiFePO<sub>4</sub> or LFP) batteries are a type of rechargeable lithium-ion battery known for their safety, longevity, and environmental friendliness. These batteries are widely used in various applications, including electric vehicles, renewable energy storage, and consumer electronics.

What is a lithium iron phosphate cathode?

The lithium iron phosphate cathode material enables the seamless use of large-capacity lithium batteries in series. The LiFePO<sub>4</sub> battery operates within a voltage range of 2.8V to 3.65V, with a nominal voltage of 3.2V, and functions effectively across a wide temperature range (-20° to +75°).

How many cycles can a lithium phosphate LiFePO<sub>4</sub> battery run?

A Lithium Phosphate LiFePO<sub>4</sub> Battery charged at 1C can typically achieve around 2000 cycles. It offers notable safety features, such as resistance to puncture-induced explosions and a reduced risk of burning when overcharged. The lithium iron phosphate cathode material enables the seamless use of large-capacity lithium batteries in series.

Middle East Lithium Iron Phosphate Battery Industry Life Cycle Historical Data and Forecast of Middle East Lithium Iron Phosphate Battery Market Revenues & Volume By Voltage Range for ...
