

New Energy Storage Subsidies

Does Germany offer subsidies for battery storage systems?

2013, the German government declared it would offer direct subsidies for battery storage systems. These subsidies would be 30% of the total system cost and connected to the latest distributed solar systems of less than 30KW. This policy was extended to 2018.

Will the Inflation Reduction Act affect energy storage projects?

Image: President Biden via Twitter. The Inflation Reduction Act's incentives for energy storage projects in the US came into effect on 1 January 2023. Standout among those measures is the availability of an investment tax credit (ITC) for investment in renewable energy projects being extended to include standalone energy storage facilities.

Is energy storage an asset?

Amendments have been made to the Law on Energy Industry Act, Federal Requirements Plan, and Grid Acceleration Act, which now declare energy storage an asset where the final deployment of electricity energy is delayed to a later point in time when it was produced. And this act was the beginning of more storage-friendly regulations.

What is G11.3 energy storage systems?

The "G11.3 Energy Storage Systems" programme is being developed to support lithium-ion technology for energy storage and power off-take facilities connected to the national grid. According to the Draft RRP Regulation:

Will Spain back energy storage?

A public consultation exercise about the proposed funding program opened on Monday and will close on Friday. Spain already backs energy storage with more than EUR600 million of NextGenEU funding which was allocated as part of Spain's, post-Covid Recovery, Transformation, and Resilience Plan.

Earlier on this month, Poland launched the sixth installment of the Mój Prąd (My Electricity) rebate program, offering PLN 400 million in subsidies for residential photovoltaic systems, battery ...
