

New Zealand container energy storage cabinet

Where can I rely on a containerised energy storage solution?

Today, we are also a name you can rely on for safe battery storage. Our containerised energy storage solutions are available as 10ft and 20ft high cubes and stand almost 3m tall, they can be deployed all over New Zealand and further afield (we have a footprint in 90+ countries).

Who can use our rentable battery storage containers?

Private individuals and businesses can use our rentable battery storage containers in any setting where they can physically be installed. Benefits include: Energy independence: break free from the grid and power your home or workplace with clean, reliable energy that you control.

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka on North Island. Paris, January 10, 2023 - Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

What is containerised battery storage?

A long-term solution: our containerised battery storage solutions are built to last for decades. Your system's precious lithium-ion core is housed in an incredibly tough shipping-grade container. Battery storage from solar panels, wind turbines or water sources can give you the independence you need.

Why should you hire a battery storage container?

Further evidence of our commitment to battery safety can be seen in our shipping containers for hire as battery storage centres. Suitable for tech and retail clients across New Zealand, our battery storage containers help secure lithium and other types of batteries--and can reduce the risk of fire in the event of an emergency.

How can containerised batteries help the transition to greener energy?

Renewable energy storage in containerised battery units is already playing a major role in our transition to greener energy. By ensuring that no energy generated by wind turbines, solar power or other eco-friendly means is lost, batteries help countries and organisations of all kinds to accelerate decarbonisation goals.

Our utility-scale energy storage solution from 1 MWh and up covers the entire lifecycle, including demand analysis, system design, system integration, installation, commissioning, acceptance, ...

Primary Equipment Containerised Energy Storage: • Standard 10-foot and 20-foot container structures for ease of transport and deployment • Integrated battery capacities of 300KWh, ...

New Zealand container energy storage cabinet

Let's face it - the energy world is undergoing a storage revolution, and container energy storage cabinets are leading the charge. Imagine a power bank the size of a shipping container that ...
