

Well, here's the thing - the global energy storage market is projected to hit \$50 billion by Q4 2025, with cross-border trade accounting for 63% of lithium-ion battery transactions. But why are ...

As global new energy storage foreign trade orders surge 78% year-over-year (BloombergNEF 2024), we're witnessing a silent revolution where battery packs are becoming the new oil barrels.

3 hours ago; China is looking to almost double its so-called new energy storage capacity to 180 gigawatts (GW) by 2027, according to an industry plan announced by authorities on Friday.

Think renewable energy developers, international traders, policymakers, or even curious investors. These folks want actionable insights--not fluff--about cross-border trade in battery ...
