

What are containerized generator / packaged container and enclosure options?

Containerized generator /Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets,balance of plant equipment,and switchgear.

What are factory-packaged containerized generator sets?

Our factory-packaged containerized generator sets are designed to address these challenges comprehensively. They offer a reduced footprint, improved ease of transportation and significantly shorter lead times.

Why should you choose genset containers?

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package,we ensure excellent reliability for your power and heat generation needs. Easy to install and disassemble,convenient for maintenance and inspection.

Why should you choose a containerized generator set?

Quicker startups for shorter deployment times. Robust Performance-Fully integrated containerized generator set is optimized for diverse critical power requirements regardless of environmental conditions.

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/without CHP in a 40ft container,making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform,you have the flexibility you need to meet a 100% load or even a smaller load.

What is unified power genset?

Unified Power offers containerized generator setswith CHP and Emission control system. Leveraging the expertise acquired during several years of manufacturing CHP/CCHP Modular containerized gas power solutions. With our genset containers offer optimal performance in various site conditions.
