

Nordic base station power system manufacturer

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

How many battery-based energy storage systems are in the Nordics?

To date, more than 200 MW of battery-based energy storage systems are operational in the Nordics. In addition, recent announcements and projects under construction amount to more than 450 MW in Sweden and Finland combined, with the pipeline in Sweden accelerating and already accounting for more than two-thirds of the total.

Why is battery-based energy storage important in the Nordics?

The region is striving to become Europe's clean energy hub and is gaining leadership in the green transition of industry. Battery-based energy storage is a vital addition to the Nordics' energy system to integrate an even higher share of renewable energy from abundant wind and hydropower.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

What is the largest energy capacity in the Nordics?

The largest by megawatt-hours energy capacity in the Nordics will be a 2-hour project in Finland that Neoen recently started building. It has a capacity of 112.9 MWh, and that is also set to come online at the start of 2025.

How did the Nordics fast frequency market change in 2020?

However, the situation changed in 2020 when the introduction of a common Nordics Fast Frequency market removed entry barriers and specifically triggered participation of fast-responding assets like grid-scale energy storage, delivering fast and attractive returns to energy storage investors and project owners.

Merus's Energy Storage System is a scalable lithium-ion battery energy storage system fully designed by Merus Power. We provide end-to-end turnkey BESS solutions across the Nordics, ...
