

How is electricity produced in North Macedonia?

North Macedonia is a net importer and domestic electricity is produced almost entirely from ESM's power plants. Electricity imports amount to approximately 20-30% of the total domestic electricity consumption and are mostly required to meet peak winter demand.

Is North Macedonia a state-owned power company?

North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s. Austrian utility company EVN has been responsible for electricity distribution in North Macedonia since entering the market in 2006.

What is North Macedonia's Energy Strategy?

As the world moves towards decarbonisation and green energy, North Macedonia is executing an ambitious national energy strategy, which foresees a 66% reduction of greenhouse gas emissions from the energy sector compared to 1990 by 2030.
