

Outdoor power supply with small battery

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO₄ batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptops or be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.

Should you buy a power brick or a portable power station?

Small power bricks have enough juice to charge your phone a few times, while a cooler-sized portable power station can keep vital electronics running during a power outage or camping trip, and the most powerful options will provide electricity to your entire house.

Do you need a portable power station for a camping trip?

If you're planning for a camping trip but don't want to completely rough it, then a portable power station can help. The DJI Power 1000 stores 1,024 watt-hours of electricity and produces 2,600 running watts and up to 4,400 surge watts.

What is the best portable power station?

With a great power-to-weight ratio, the latest version of the Bluetti Elite 200 V2 is a great portable power station for powering a camper or providing backup power for the essentials. With its tremendous capacity, the EcoFlow Delta Pro 3 is truly capable of providing a whole-home backup without gas or solar panels.
